

## Project Model

### Project Initiation

- UNAPEN project model/execution discussion and selection
- Project team members identified
- Budget for next steps

### The "WHAT" (Business / Professional services)

- Discover and document needs
- Define scope of work
- Identify risks and mitigation

#### Deliverables

- Business Needs document or Professional Services w/o
- Estimate for Design Analysis (if necessary)

### The "HOW"

- Develop Design Analysis
- Determine technical specifications
- Establish critical success factors

#### Deliverables

- Design Analysis, tech specs, and implementation plan
- Alternatives (if applicable) & Client acceptance criteria
- Project plan / Test estimate for project execution

### Execute design, development, and test

- Detailed design and development
- Quality assurance testing
- Client acceptance

### Implementation and support

- Review implementation plan and back-out options
- Implement
- Post implementation support

## unlock the potential
